*What does a pan balance tell us about the weight order of the cubes?*

**We used a pan balance to compare the weights of the cubes.**

Here's what my group found out.

Weight order using pan balance:

Least Weight ----- Most Weight							

Here's how the weight order using our hands and the weight order using a pan balance compare:

---

---

---

---

Our class decided the order of the cubes by weight is:

Least Weight ----- Most Weight
